

Special AS24/30T Grinding Disc (Steel Only)

We are pleased to advise that on approximately the 15th of December we will be landing a new range of Dronco Grinding Discs! We have had these new discs well tested by customers who know their grinding discs and the feedback has been very positive. They have advised that they thought they were fantastic and are looking forward to using them!

We believe the AS24/30T will become the grinding disc of choice for people doing work with steel (they are not suitable for stainless steel).

The price is the same as the Inox Special Grinding Disc (suitable for stainless).

Please see below for more information on the discs.

All-purpose grinding disc with medium-hard bonding for light grinding operations, offering good metal removal rate and a long service life.

For Use On:

- Very solid construction steel
- Tool steel
- High-speed steel
- Sheet steel
