

Introducing another great construction fastener.

 **AnchorMark**

S2 TPC Screw

Series 2 Timber, Panel, Cladding Screw

Stylish finish and extremely fast performance in timber, panel & cladding with timber substructures.

 **MADE
IN
GERMANY**

S2 TPC - Series 2 Timber, Panel, Cladding Screw

TECHNICAL DATA

AnchorMark - S2 TPC Panel Screws

Art. No.	Stainless Grade	Finish	Diameter [mm]	Length [mm]	Drive	Qty [pce]
6636751	316/A4	SILVER STAINLESS	3,5	37	SIT®20	500
6636752	316/A4	VINTAGE BRONZE	3,5	37	SIT®20	500
6636754	316/A4	SILVER STAINLESS	3,5	50	SIT®20	500
6636755	316/A4	VINTAGE BRONZE	3,5	50	SIT®20	500

1) The small cylinder head with SIT® drive (TX compatible) for a neat and subtle finish allows for optimum torque transmission, a tight and snug fit, and fast centering

2) The aggressive shank gives the screw extreme grip with reduced drive-in torque; making the screw suitable for use in hardwood without snapping

3) The asymmetrical thread enables the screw to feature a reduced setting torque, making it easy to screw in. Enjoy up to 30% faster screwing time due to the screws anti-friction coating

4) A new pyramid shaped drilling tip reduces splitting of the timber and allows faster drilling; optimised for hardwood decking and cladding

The **stainless steel grade of the screws (316/A4)** gives the screws a high corrosion and weather resistance, increased fracture torque, and makes them suitable for outdoor use and close to water applications.

For best results, we recommend pre-drilling and pre-countersinking holes.
Pre-drilling may be necessary in extremely hard timbers.

holding New Zealand together since 1989
