* Available colours

Unique and stylish finish for your composite or hardwood decking and cladding with steel substructures.

The advantages of this screw are:

- 316 stainless steel with additional zinc coated steel tip offers a high degree of weather resistance
- The self drilling tip makes the installation quick & easy
- Small head diameter ensures that the head can sink in cleanly and easily
- Timber is protected from tearing or splitting by the drill tip
- Smooth head for a perfect barefoot proof finish
- **8 different colour matched heads**

(Currently available colours are: Black, Aged Wood, Silver Grey and IPE. Check website for updates)
